

Point of view

Streamline operations and delight members with mortgage-as-a-service

Modernize your building society's mortgage business with Unisys

By putting your members first, you can build stronger relationships, drive loyalty and, ultimately, grow your business. Because when your members are happy, your society thrives.

Thrive amid turbulence

The mortgage industry is constantly evolving — from rules, regulations and technologies to market rates and conditions. To keep pace, building societies need agile and scalable solutions that can adapt to these changing conditions so you can better serve your members. Traditional mortgage solutions designed for large financial institutions or outdated legacy systems are no longer sufficient to meet your needs.

You don't have to settle for subpar solutions that fail to deliver on your business objectives. With mortgage-as-a-service (MaaS), you can take your building society to the next level and thrive in the midst of industry turbulence.

Meet mortgage-as-a-service

MaaS is an end-to-end solution that provides comprehensive support for the entire mortgage process. Not only does MaaS offer you the tools to manage the entire mortgage lifecycle — from lending decision engines to automated underwriting — you can also use the solution to create a seamless and effective journey for your members. By putting your members first, you can build stronger relationships, drive loyalty and, ultimately, grow your business. Because when your members are happy, your society thrives.

With MaaS, you can reduce costs while optimizing and modernizing your mortgage and savings business.

Mortgage-as-a-service

Drive business outcomes and accelerate your building society's success with an end-to-end mortgage solution

Boost your organization's agility with industry-leading flex modules and supplementary capabilities.

Streamline your processes with an end-to-end solution that includes core and branch banking solutions, multichannel sales, mortgage origination solutions and more.

Stay current and compliant with expert-driven governance and support services.

Operate with ease with managed infrastructure services, including network, security and regulatory capabilities.

How Unisys can help

Because building societies operate differently than other financial institutions, you need a partner who understands your business model. As a leading system integrator, Unisys has worked with many building societies and contributed to their success over several decades. Our deep knowledge and expertise — combined with MaaS and Unisys Core Banking Solutions — help us deliver holistic solutions securely. Plus, our range of industry partners and allied solutions allow us to act as a single source for all your technology needs.

We understand the regulatory landscape and keep pace with the industry's changing needs, leaving you to focus on supporting your members and growing your building society.

Ready to take your building society to new heights? Unisys offers three pathways:

- **Supporting your new innovations:** Implement agile innovations — such as unified communication and collaboration tools — across your business processes with our help to grow your organization.

- **Assisting with your modernization plans:** Transform your existing applications or seamlessly migrate to your preferred solution, so you can adapt to the growing needs of your business.
- **Constructing a new model:** Team up with Unisys to define how to transition to MaaS with your existing IT estate or move to our environment.

Together, we can help your organization adopt agile innovations to transition your existing IT estate to MaaS — as we have for other building societies in the U.K. Let MaaS empower you to achieve your business objectives and accelerate your success.

Why Unisys?

Unisys is a trusted provider to financial institutions worldwide, specializing in core, branch and digital banking solutions. We apply deep banking industry knowledge and have experts who can help you move your business forward in adopting digital technologies with the benefit of enhancing your customers' experience.
